Uttam Khatri

LinkedIn: https://www.linkedin.com/in/uttam16/ Email: uttamkhatri169@gmail.com
GitHub: github//uttamkhatri169 Mobile: +91-7737157755

SKILLS

Languages: Java, Python
Frameworks: Node.js, Express.js, Bootstrap, Flask, TensorFlow, Scikit-learn, HTML, CSS
Tools/Platforms: MySQL, Git, VS Code, Google Colab, Jupyter Notebook
Soft Skills: Passionate-Learner, Team Player, Adaptability ,Problem Solver

INTERNSHIP

Futurense Technologies | Data Analyst Intern |Link Jun' 25 – Aug' 25

- Analyzed and interpreted large-scale datasets to extract actionable business insights, improving reporting accuracy by 20% and enabling more informed data-driven decision-making.
- Automated end-to-end data cleaning and preprocessing workflows using Python and Pandas, reducing processing time by 40% while improving data quality and consistency.
- Designed and developed interactive Power BI dashboards with real-time data visualizations, enabling stakeholders to monitor key performance metrics and support faster business decision-making.

PROJECTS

Sign Language Recognition System | GitHub May' 26

- Engineered a real-time Deep Learning, Computer Vision, and NLP-based Sign Language Recognition system using PyTorch, OpenCV, and MediaPipe, achieving 99.0% validation accuracy on the ASL Alphabet dataset across 29 gesture classes.
- Designed a custom CNN architecture with Batch Normalization, dropout, data augmentation, and learning rate scheduling, then fine-tuned the model on a custom webcam dataset to improve robustness for real-world gesture recognition.
- Integrated a live webcam inference pipeline with MediaPipe hand landmark detection, Grad-CAM explainability, and a gesture-to-text translation module, enabling low-latency, interpretable real-time predictions.
- **Tech**: Python, PyTorch, CNN, OpenCV, MediaPipe, Natural Language Processing (NLP)

AI Financial Copilot | Github Mar' 26

- Developed an AI-powered personal finance assistant to track transactions, categorize expenses, and provide real-time insights into spending behavior.
- Implemented machine learning models for automatic expense categorization and future spending prediction using historical data.
- Designed an interactive dashboard with analytics and visualizations to help users monitor finances and make informed decisions
- **Tech**: Python, FastAPI, Next.js, SQLite, Scikit-learn, Recharts

Wallmart Sales Prediction Web App | Github May' 25

- Developed an end-to-end ML-powered web app to forecast Walmart sales across categories and stores
- Built interactive dashboards and visual analytics for real-time sales insights and trend analysis**.**
- Implemented an inventory management module to compare predicted demand with stock levels and suggest restock/overstock actions.
- **Tech**: Python, Flask, Scikit-Learn, Pandas, JavaScript, HTML/CSS, Chart.js / Plotly.

CERTIFICATES

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | **Oracle** Sept' 25
Certificate of Completion of DSA Course by Apna Collage | **Apna Collage** Dec' 24

ACHIEVEMENTS

Qualified for Round 2 of Adobe India Hackathon 2025 – Top 4,000 among 95,000+ teams.
Shortlisted for Smart India Hackathon 2024 – Top 900+ teams.

EDUCATION

Lovely Professional University Phagwara,Punjab
Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE) Aug' 23-Present
Specialization in Artificial Intelligence and Data Engineering; **CGPA : 8.01**

Mata Sheetla Public Sr Sec School Rindhana, Sonipat
Intermediate; **Percentage:** 87.6% Apr' 21 – Mar' 22

The Aaryan Public School Lakhan Majra, Rohtak
Matriculation; Percentage: 94% Apr' 19 – Mar' 20
